

PROFESSIONAL ELECTRIC HOT PRINT STAMPING MACHINE - OPUS MASTERPRESS EMD DEEP

PRODUCT DESCRIPTION

The Deep version of the MasterPress EMD equipment enables hot print stamping of deeper materials. All of this thanks to the extension of the heater's projection up to 302 mm. The remaining parameters of the equipment are similar.

The electric Masterpress EMD is a hot print stamping machine with an A4 heating block area.

The Masterpress can be used with magnesium, brass or copper matrices – attached with glue or screws. It can also be used with Opus brass fonts for easy type-setting – perfect for names, titles, thesis books, year books, photo books and more. Perfect for foiling on case covers, books, cards & much more.

The electronic display shows adjustable temperature (30 to 190°C), pressure time, pressure force, foil length, height control & counter. With up to 5 tons of pressure, the hot print stamping machine is a versatile option for small print firms new to foiling or a short run vertical print option for the experienced foiling company with larger machines.

PRODUCT SPECIFICATION

Maximum matrix size: 218 x 308 mm

Temperature regulation range: 30 - 190°C

Maximum cover width (without side limiter): none or not applicable

Maximum width of the cover (with side limiter): none or not applicable

Maximum pressure: 5000 kg

Force pressing adjustment: Yes

LCD display: Yes

Stamps couter: Yes

Automatic film rewinding: Yes

Power supply: 220 - 240 V, 50 / 60 Hz

Maximum power consumption: 2000 W

Rated power: 1500 W

WEIGHT

- **net weight:** 153 kg
- **gross weight:** 240 kg
- **stand net weight:** 43 kg

DIMENSIONS

- **height:** 887 mm
- **width:** 510 mm
- **depth:** 795 mm

WARRANTY

- **device warranty:** 2 years
- **72h service:** No
