

## DISK AND FLASH DRIVES SHREDDER - OPUS DATAPREDATOR

### PRODUCT DESCRIPTION

---

dataPREDATOR

# CHROŃ DANE!

data **PREDATOR**

HOW DO YOU DESTROY A HARD DRIVE SO THAT THE DATA IS UNRECOVERABLE?

---

Mechanically is the most effective method of removing data from electronic media. This is not easy and therefore, for the needs of many companies, the OPUS dataPREDATOR hard disk shredder was created. This is a specialist device designed for manual destruction of 2.5" and 3.5" HDD disks, SSD disks, pendrives, mobile phones and tablets.

## DESTROY YOUR DISCS YOURSELF BEFORE YOU THROW THEM AWAY, NOW IT'S QUICK AND EASY!

---

Due to its design, the OPUS dataPREDATOR media shredder enables secure, stable perforation or cutting and does not require a power connection - it is manually operated. It is ideal for many offices and institutions, wherever there is awareness of the value of data and the consequences of its possible leakage.

## VERSATILITY - WHAT DATA MEDIA CAN YOU DESTROY?

The shredder is capable of destroying media up to 30 mm thick, including: 2.5" and 3.5" HDD, SSD, pendrives, mobile phones and tablets. Interchangeable attachments and perforation tools allow you to adapt the device to the most popular media.

## PORTABLE DEVICE WITH ENORMOUS POWER FOR DESTROYING HARD DRIVES AND MORE!

The OPUS dataPREDATOR shredder is designed to be moved between workstations when required. It does not require considerable strength to use, light and convenient operation was made possible by the use of an eccentric mechanism. Despite its small size the shredder has a shredding pressure of up to 1.5 tons.

## EASY TO USE, ANYONE CAN NOW DESTROY A HARD DRIVE BEFORE IT IS RECYCLED

---

Precisely thought-out design, including a pull-out drawer for easy disk insertion. The ergonomic arm ensures comfortable and trouble-free operation. In addition, the waste drawer ensures tidiness in the workplace and full control over shredded equipment.

## ROBUST AND RELIABLE - DESTROYING HARD DRIVES FOR MANY YEARS

The shredder is made entirely of metal and it is powder-painted, which guarantees many years of trouble-free operation. The device does not require specialist technical maintenance. The disc-cutting tools can be replaced when worn out.

## EVERYTHING YOU NEED IS INCLUDED WITH YOUR DISC SHREDDER

---

The shredder requires no assembly and is ready to use immediately after unpacking. Attachments for different types of discs, phones or tablets are included in the packaging. A cutting tool is also included.

## COMPLIANCE WITH DATA PROTECTION REQUIREMENTS, DIN 66399 STANDARD!

---

The device is designed for destroying 2.5" and 3.5" HDD disks (DIN66399 standard, class H3), SSD disks and pendrives (DIN66399 standard, class E2) as well as mobile phones and tablets. Due to its effectiveness, efficiency and design, it equips many companies in Poland and worldwide.
