

PräziGard

Endpaper gluing machine

The **PräziGard** is designed to glue folded endpapers to sewn book blocks.

The machine is characterized by the following features:

quick format change

exact alignment of the endsheets at the book block head by means of a pusher

easy cleaning

instant pressing in the pressing station after gluing

Technical data:

Floor space:	154 x 39 cm
Height:	36.5 cm
Weight:	27 kgs
Power supply:	230 V - 50 Hz (A. C.)

Book block sizes:

Width:	110 - 225 mm
Height:	148 - 320 mm
Thickness:	1 - 50 mm
Output:	max. 360 cycles / h

Subject to technical alteration.

The World of Bookbinding.

PräziGard

The **PräziGard** is designed to glue folded endpapers to sewn book blocks. The machine applies a strip of glue on endsheets and connects them to the book block.

The front endpaper, the book block and finally the rear endpaper are inserted into their foreseen slots. One of the guide elements aligns the endpapers with the top edge of the book block and a strip of glue is applied on the endpapers. The book block

is forwarded to the pression station where the endpapers are pressed against it. It may then be removed.

As long as format and thickness of the book blocks do not change, several cycles may be completed in a row.

For processing wider book blocks, an additional front support (included in delivery) may be attached to give it more stability.

Recommended consumables

- Adhesive **PräTack E40** (item no. 362008XX)

Applications:

hardcover books

notebooks

diaries

organizers
